### 7903500 | PenoGuard™ Construction

PenoGuard™ eliminates the commonly used hazardous industry practice of utilising pieces of plywood or makeshift guardrails to prevent workers from falling through access holes and floor penetrations in the construction industry.

A 2-in-1 lockable safety device that is easily secured to the deck with nails, screws or bolts, PenoGuard™ improves site safety around construction openings by solving the elements of penetration awareness and fall protection.

When in the closed position workers are fully protected and alerted to the presence of a penetration, eliminating any risk of falling through. When in the open position a four sided high viz guard rail allows easy access to the penetration while protecting workers around the hole.

*"PenoGuard™ is lightweight and easy to use with engineered safety. When access is required the quick and easy fold down frames are raised, eliminating the gravitational risk and when closed the system can be locked off to prevent any unauthorised access. We recommend PenoGuard™ fit for purpose in this application and commend the product for providing the solution to our problem".*

Eric Randell, Site Supervisor  
Bovis Lend Lease

**LIGHTWEIGHT & PORTABLE**  
PenoGuard™ is light weight and portable, making it ideal to transport from job to job. The system provides an effective and economical solution for the prevention of falls around penetrations.

**EASY ASSEMBLY**  
Once secured over the penetration PenoGuard™ assembles to a four sided guard rail in less than a minute with four simple steps. Disassembly, or 'Lock Down', is just as simple.

**BUILT TO LAST**  
Constructed from high strength steel, PenoGuard™ has a load rating of 200kg in the closed position and 150kg when used as a four sided guard rail, ensuring the ultimate in safety, security and durability on any job site.
